

"I am a keen golfer and cricketer and over the past 18 years have been complaining of a painful left foot, during and after both activities. It had got to the stage where I was struggling to complete 18 holes of golf without the aid of a buggy and at 38 years old, this was becoming very concerning. After seeing specialists and having a scan, I was diagnosed with suffering from arthritis. I had already received open surgery for arthritis on my right shoulder 4 months previous, and saw this further diagnosis as another nail in my sporting coffin.

However, in March 2004, Ronnie Irani introduced me to PST, and I must say I was very sceptical, but was willing to try anything. I had nine, one-hour sessions on the PST treatment and by

the end of the treatment I felt a slight improvement. I was still unsure whether it was real or I was just imagining the improvement. However, over the last eight weeks the foot has improved tremendously and I am, for the first time in nearly 2 years, not feeling pain at all from it. I played a 36-hole golf day recently, carried the bag all day, and have had no reaction at all.

I would recommend this treatment to anyone with similar ailments to myself, and I genuinely believe that PST has transformed and elongated my sporting career."
